

Vertical Bridge Job Description

Job Title:	Director of Business Intelligence	Date:	4/01/2021
Department:	Information Technology	Location:	Boca Raton
Reports To:	Senior Vice President, Information Technology	FLSA Status:	Exempt

Purpose:

The Director of Business Intelligence is primarily responsible for building, developing, and advancing the Company's approach to data analytics. Leading a small group of data engineers will require a hands-on approach with strong leadership and collaboration skills. The role will drive technology best practices in terms of execution and implementation, along with platform selection to facilitate the Company's data ecosystem.

Job Functions:

1. Lead and inspire a small group of data engineers and work collaborative with the team to provide ample opportunity to grow and challenge the skillsets of the group.
2. Define, plan, and implement all Business Intelligence initiatives in a timely manner, respecting the commitments made to the business partners.
3. Determine strategy for people, process, product, and technology that enables the business to use data in predictive and strategic way. Develop a strong curiosity for the role, and the team, to seek what is next for the data strategy of the company
4. Collaborate with leadership and other key individuals to understand business needs and opportunities of how business intelligence can be used to assist in the day-to-day operations
5. Provide a high level of energy, engagement, collaboration, and communication with staff; with a commitment to deliver continuously
6. Supplement the team's development when needed to ensure commitments are made, and value is being delivered to the business
7. Lead assessments to identify data assets, evaluate current technology stack and capabilities. Establish a roadmap for advancing these areas to successfully execute on data strategy
8. Advance IT maturity, enabling data-driven decisions and automation opportunities that lead to reduced timelines and resources while increasing overall capabilities

Working Conditions and Physical Demands:

Position will work directly in the corporate office. Candidate must have the flexibility to occasionally work overtime.

Qualifications:

1. Minimum of 10 years of experience in data analytics implementation, from requirements gather with business partners, through development, testing, training, and implementation
2. Minimum 10 years of experience with enterprise-level data platforms and functions; including but not limited to Microsoft SQL Server, Azure SQL, Azure Data Lake, Azure Data Factory, Azure Functions, Analysis Services
3. Minimum 5 years of extensive Microsoft Power BI implementation and development
4. Minimum 5 years of understanding Database Administration key concepts; optimization, backups, replication
5. Experience in the NetSuite platform a plus
6. Experience in Data Science, Machine Learning, or Artificial Intelligence a plus
7. Experience in GIS Spatial data analysis and implementation a plus

Vertical Bridge Job Description

8. Experience in developing ESRI ArcGIS platforms a plus
9. Experience in Boomi Integration platform a plus
10. Knowledgeable of web-based software development technologies (Angular, JavaScript, jQuery, HTML5) or experience with similar framework, RESTful API and JSON, ASP.NET MVC and traditional ASP.NET technologies (i.e., web forms, web controls, WCF and SOAP services) a plus
11. Knowledge of software development life cycle (SDLC) best practices including version control and, preferable, exposure to test driven development. Experience in an agile environment is helpful.
12. Must possess excellent written and verbal communication skills, the ability to establish and maintain effective working relations with internal and external clients as well as vendors.
13. Need the ability to follow established company protocol and communication guidelines, and be able to prioritize tasks in a fast-paced environment and work well within a team-oriented environment as well as being able to work independently
